

CheckBox::setCheckBoxPosition

```
graph LR; A[CheckBox::setCheckBoxPosition] --> B[Label::getText]; A --> C[Label::setTextPosition];
```

The diagram illustrates a function call sequence. A central gray box labeled 'CheckBox::setCheckBoxPosition' has two blue arrows pointing to the right. The top arrow points to a white box labeled 'Label::getText', and the bottom arrow points to a white box labeled 'Label::setTextPosition'. This indicates that the 'setCheckBoxPosition' function depends on or calls both 'getText' and 'setTextPosition' methods of a 'Label' object.

Label::getText

Label::setTextPosition
