

DropDownMenu::processEvents

LevelList::processEvents

Inspector::processEvents

Button::isButtonClicked

```
graph LR; A[DropDownMenu::processEvents] --> D[Button::isButtonClicked]; B[LevelList::processEvents] --> D; C[Inspector::processEvents] --> D;
```

The diagram illustrates a central method, `Button::isButtonClicked`, which is the target of three other methods: `DropDownMenu::processEvents`, `LevelList::processEvents`, and `Inspector::processEvents`. Each of these three methods is represented in a white box with a black border, while the target method is in a gray box with a black border. Blue arrows point from each of the three source methods to the target method, indicating a flow or dependency.
